Summary

Android and React Native Developer with hands-on experience in building and deploying scalable mobile applications using React Native, Flutter, Firebase, REST APIs, and modern UI development practices. Experienced in developing production-level applications with authentication systems, real-time features, and Play Store deployment. Passionate about building impactful software products and continuously learning modern technologies.

Technical Skills

Languages: JavaScript, TypeScript, Dart, C++, Python, Java/Kotlin
Mobile: React Native, Flutter, Android Development
Backend: Node.js, Express.js, REST APIs
Database: Firebase (Auth, Firestore, Storage), MySQL
Tools: Git, GitHub, Postman, VS Code, Android Studio, Expo
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, State Management, Clean Architecture

Education

Shri Ramswaroop Memorial University, Lucknow 2022 – 2026
Bachelor of Technology – Computer Science and Engineering CGPA: 8.27/10.0

Experience

Android Developer Intern – SlotinSolutions June 2025 – May 2026

- Developing and maintaining production-grade mobile applications using React Native with responsive and scalable UI components, serving 5,000+ active users.
- Integrating REST APIs, Firebase Authentication, and Cloud Firestore for real-time data synchronization and secure user management.
- Building reusable components and optimizing application performance, achieving 40% improvement in load times and 35% reduction in crash rates.
- Collaborating with cross-functional development teams in an Agile environment to deliver high-quality features on schedule.
- Implementing real-time features including push notifications, chat functionality, and live data synchronization for enhanced user engagement.

Projects

Jinete – Student Ride Sharing Application *React Native*

- Built a comprehensive ride-sharing mobile application focused on student transportation and smart commute management for 200+ university students.
- Developed responsive user interfaces and integrated Google Maps API for route optimization and real-time location tracking.
- Implemented secure Firebase Authentication and Firestore database for user management and ride data storage.
- Designed intuitive UI with real-time ride matching, driver tracking, and rating system for enhanced user experience.

OverReact – Cricket Fan Community App *Flutter*

- Developed a feature-rich Flutter application for cricket fans featuring live match scores, memes, polls, predictions, and community engagement modules.
- Built responsive Material Design UI with 30+ reusable widgets, ensuring consistent experience across multiple devices.
- Implemented gamification features including leaderboards, achievement system, and prediction modules, increasing daily active users by 45%.
- Integrated Firebase services for real-time data updates and optimized performance, achieving 60 FPS on mid-range devices.

Women Safety Analytics Model *Machine Learning*

- Developed a machine learning model for women safety analytics using predictive algorithms to identify high-risk areas.
- Implemented data preprocessing techniques and feature engineering to improve model accuracy by 20%.
- Integrated with GIS data for real-time safety mapping and visualization.
- Deployed model using Flask API for integration with mobile applications.

Certifications

GFG 160 Days of Problem Solving – GeeksforGeeks (Completed 150+ coding challenges covering DSA and algorithms)
AI for Beginners – HP LIFE (2025)

Languages

English: Professional Working Proficiency **Hindi:** Native/Bilingual Proficiency
